DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 5/5/2006, with respect to double patenting rejection issued on 3/1/2006 have been fully considered and are persuasive. The final rejection issued on 3/1/2006 has been withdrawn.

Allowable Subject Matter

1. Claims 1-14 allowed.

2. The following is an examiner's statement of reasons for allowance: A method for forming an MTJ (magnetic tunnel junction) memory cell having a substantially circular horizontal cross-section, wherein a ferromagnetic free layer in said cell has uniaxial magnetic anisotropy provided by exchange coupling with a top antiferromagnetic layer formed thereon comprising: providing a substrate, forming on said substrate a layered magnetic tunneling junction (MTJ) structure, said formation further comprising: forming on said substrate a seed layer; forming on said seed layer an antiferromagnetic pinning layer; forming on said antiferromagnetic pinning layer a synthetic antiferromagnetic (SyAF) pinned layer; forming on said pinned layer a tunneling barrier layer; forming on said tunneling barrier layer a ferromagnetic free layer, forming on said ferromagnetic free layer said top antiferromagnetic layer; forming on said top antiferromagnetic layer a capping layer; annealing said layered MTJ structure in an external magnetic field, thereby pinning said SyAF layer and exchange coupling said top antiferromagnetic layer to said ferromagnetic free layer to produce, thereby, a uniaxial

magnetic anisotropy in said free layer; patterning said layered MTJ structure to create a horizontal cross-sectional shape that is substantially circular.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
